### Desperate Struggle

These Red Army soldiers shown in shallow trenches somewhere on the Eastern Front, are part of the Soviet millions fighting desperately to stem the tide of Nazi invasion. Lack of competent leadership, due to Stalin's bloody purge of the army in 1937-38, threatens to bring to naught all their heroic

## Kremlin Unable To Hide Scope Of Reverses

Lack of Leadership, Due to Stalin's Army Purge of 1937-38, Is Reason for Defeats

By ART PREIS

The existence of the Soviet Union now hangs in the balance. Stalin himself can no longer conceal that he has led the Soviet Union to the brink of catastrophe. No longer does Stalin — the self-appointed Commissar of War, Head of the Council of Defense, etc. — brag about the "invincibility" of Soviet arms.

Hitler's military machine has already seized or immobilized 75 per cent of the industrial area of the USSR. Leningrad and other vital cities, not only in the Don basin but in the very heart of the Soviet Union, are either occupied or immediately threatened. Nazi armies are driving relentlessly toward the political and economic nerve-center of the Soviet Union, Moscow. The Red Army is being forced back on all fronts.

The latest Moscow dispatches are shot through with the panic the danger is great; the enemy that is gripping the Kremlin.

Stalin has clamped down on dis- Soviet troops acknowledging that semination of news of the real "our resistance is entering a crisituation, Red Star, official organ tical phase; the enemy must someof the Red Army, on October 10 how be stopped.' had to admit that on the Moscow

Soviet rulers have labeled all justments as are now wrung from Red Star, the GPU jails and shoots Soviet workers and peasants as "panic-mongers, spies and diversionists, etc.'

For the first time since the war Russians have met with great losses," reports the Moscow correspondent to the New York Times, October 14. And the Kremlin censor dares not delete!

As the Red Army suffers defeat after defeat, Stalin tries to uphold his shattered prestige by belittling Soviet losses. A Kremlin spokesman recently claimed that the Nazis have suffered a threeto-one loss in trained manpower and a two-to-one loss in guns, tanks, etc... Hence the Kremlin boast: The more defeats, the surer terest in the trial has already the final victory! Hitler is drainbeen aroused. convention.

JUDASES

By DON DORE

The Communist Party has publicly joined forces with the Communist Party declared: Roosevelt, William Green, Sidney Hillman and the Wall Street bosses in condemning strikes.

Carrying to a logical conclusion their position of unconditional support of the Roosevelt capitalist government and its imperialist war, the Stalinists, in a featured editorial in the Daily Worker, October 10, de-

clared: .President Roosevelt rightly declared that 'this is not the time to take chances with the national safety through any stoppage of defense work

or defense production'. . ." In unambiguous strikebreaking terms, the Daily Worker further stated that it opposed "anything that interferes with production of needed war supplies — whether as a result of strikes or of delays by the employers. . ."

The Stalinists make it clear that their position on strikes and militant labor action is identical with that of the most reactionary, racketeering elements in the union movement. With undisguised approval, the Daily Worker quotes AFL President William Green's speech to the AFL convention when he reiterated his "no-strike" policy and stated:

"Here and now in plain words I call upon every member and every union in the American Federation of Labor to stay on the job and keep defense production going at full blast. . ."

ENDORSE GREEN'S STRIKEBREAKING PROGRAM

The policy of Green which the Communist Party endorses is one of downright strikebreaking. Green and his colleagues of the AFL Executive Council not only gave strikebreaking aid to the open-shop corporations against the CIO in the Ford Motor, International Harvester, and other strikes, but in the name of, "national defense" they supported government strike breaking against the AFL machinists in San Francisco, etc., and curbed every effort of the AFL workers to strike for higher wages against the rising prices.

This is the policy and record which the Communist Party now approves and undoubtedly will seek to surpass. Henceforth, the Communist Party will seek to smother every attempt of the workers to fight for their rights and conditions and will aid or condone government strikebreak-

This is the policy that the Communist Party itself condemned just four days before the outbreak | trade union members and sympaof the Soviet-Nazi war, when the Daily Worker, June 18, declared:

"Those ninety-nine labor officials who vesterday released a statement urging the President to hurry into the imperialist slaughter are treading the nath of the reactionary AFL leaders in the last World War.

"It is interesting that these 99 officials call upon the President to 'go forward' against 'slavery'. The President is going forward, but is for slavery - slavery for the organized workers at the point of a bay-

Today, however, the Daily

"Above all, it is evident that the President's national emergency is intended to curb the rights of labor and to crush all popular opposition to his war program." (Daily Worker, June Worker cynically asserts:

1, 1941). Now the Communist Party eeks to deprive labor of every (against strikes) with regard right and weapon with the infamous declaration that Roosevelt's no-strike program for organized labor "is strengthening rights. On the contrary, it is labor's cause."

> The Daily Worker makes the same assertions which the cowardly and venal trade union bureaucrats of the Green ilk have always made to block militant la bor action.

"... Stoppages in defense industries under present conditions also play into the hands of those employers... who seek for an excuse for not treating with labor on equal terms."

But when has the boss class not correctly denounced as "the misleaders of labor of every stripe sought for excuses "for not treat-- the William Greens, the Sidney ing with labor on equal terms?" Hillmans, who have tried to drag The Communist Party wants to Labor captive and helpless into avoid giving "excuses" to the Wall Street's war." (Daily Work- employers - by capitulating to them altogether.

> FOR "PROPER FORMS OF STRUGGLE"

The Stalinists dare not state unscrupulously attempts to cov- this in so many words. They are forced to recognize the fact that the workers have no intentions of submitting unconditionally to the boss class in the interests of "national defense." Therefore, the Communist Party includes in its no-strike statement certain entire CIO, by falsely declaring proposals calculated to give the impression that the Stalinists want to "protect" labor during the war-time reaction.

"Labor should find ways to deal with employers who seek to exploit the war to make exorbitant profits and to refuse labor its rights - but to deal with these employers in such a manner as will not weaken the defense effort. . . Labor leaders have the responsibility to find proper forms of struggle in the present situation."

But what "proper forms of struggle" has labor other than struggle" will the Greens, Tobins, be weeded out...." The Stalinist workers them- Wolls and Hillmans — the only selves will be among those who | "labor leaders" the Daily Work- | Party is asking the working torous policy. The rank-and-file have been the unremitting foes thizers of the Communist Party of all forms of genuine labor struggle?

Let the Communist Party tell the American workers what these other "forms of struggle" are! It does not, and cannot say. No others exist.

All that the Stalinist leadership tells the workers is that they Stalinist trade-unionists who must "insist" that "the governplayed a leading role in the North | ment assume the responsibility of American Aviation, Allis-Chalmseeing that the rights of labor ers and other strikes of the past are recognized... that the comsix months have felt the full fury position of mediation and other of the armed violence and strike- boards be of such a character breaking actions of the govern- as to guarantee that labor's rights are respected... that all lessly oppose such an "equal" In the period of these strikes anti-labor policies of the govern-

## Help Fight The Federal Prosecution

29 people—members of the Socialist Workers Party and the leaders of Motor Transport and Allied Workers Industrial Union, Local 544-CIO have been indicted in Minnesota on charges of "conspiring to overthrow the government."

This sweeping attack upon civil liberties and labor's rights must be repelled! The job of defending the victims of this prosecution is up to the workers themselves. Roosevelt's administration isn't subsidizing this defense project.

Aid the defendants by giving promptly and generously to their Defense Fund.

## Our Party's Guide To Immediate Action

### Text Of The SWP Plenum Resolution On "The Federal Prosecution And The Present Tasks Of The Party"

Resolution Adopted by the Plenum-Conference of the Socialist Workers Party, Oct. 11-12, 1941, in Chicago, Ill.

The prosecution launched against our party by the Roosevelt administration can be understood in all its ramifications only in the light of the historical situation of the American imperialists whom Roosevelt serves.

The American bourgeoisie has virtually dragged the unwilling American people into the war. Roosevelt's real war aims are expressed not in his deceitful 8-point program, that shriveled caricature of Wilson's 14 points, but in the recent declaration by Secretary of Navy Knox that Anglo-American imperialism must police the world "for the next hundred years." Roosevelt's aim of world conquest, like Hitler's, is not a sign of strength but a mark of the desperate plight of world capitalism and of every one of its component national states. The gigantic development of the forces of production is driving all the imperialists to goals which lie beyond their power of attainment. Hitler and Roosevelt are attempting to establish their sway over a decomposing capitalist system — a system torn by incessant imperialist conflicts, shaken by colossal social convulsions and headed for economic ruin and catastrophe.

The permanent perspective of monopoly capitalism is war. Until now capitalism evolved through periods of peace punctuated by occasional wars; henceforth intervals of peace, if any, will merely punctuate the continual clashes of the imperialist powers. None of the imperialist rulers have any faith in their future. Hence their desperate methods of crushing every form of opposition at home. Fascist terror is not an Italian or German weapon; the American bourgeoisie will likewise attempt to resort to it. The wartime repressions against the labor movement will prove to be not temporary expedients dictated by wartime onditions, but the forerunner of dictatorial and fascist movements of the American bourgeoisie.

It is in the light of this perspective — the perspective of an epoch of wars and revolutions — that we must consider the problems which confront the party as a result of the Federal prosecution.

#### THE PROSECUTION AND THE DEFENSE

1. This prosecution arises immediately out of the federal government's intervention on the side of AFL Teamsters' Chief Daniel Tobin against Local 544-CIO. But the Minneapolis drivers and Tobin clashed in the first place over the refusal of the Trotskyist leadership of Local 544 to go along with Tobin in subordinating the trade union movement to the war program of the Roosevelt administration. Thus the government's "intervention" is on its own behalf. This blow against our party is but the first of many to come against every section of the labor movement which resists the reactionary consequences of the government's war program. We are the first to be attacked because we are the only genuine anti-capitalist party and therefore the only genuine anti-war party. The object is to drive the party into illegality and, if possible, to silence it.

The policy of the party in defending itself in court, obligatory for all party members under indictment, can only be one that is worthy of our movement and our tradition: no attempt to water down or evade our revolutionary doctrine, but on the contrary, to defend it militantly. At the same time we maintain that we have a legal right under the Bill of Rights to propagate our principles.

2. The legal defense in court and in the arena of public opinion is strengthened by the fact that both the Socialist Workers Party and Local 544-CIO and all the defendants have agreed to the launching of a broad defense campaign by the Civil Rights Defense Committee. Such a united defense will obviate many difficulties. It will dramatize the fundamental connection between the rights of our party and the democratic rights of the trade union movement.

3. Despite this prosecution and others which may follow, our party will not surrender its right to function as a legal party. The Plenum Conference emphasizes to all party members the fundamental importance of a determined fight for the party's legality. The question of whether the party is legal or illegal will not be settled for us by a conviction in this Minnesota case.

4. One of the main methods of defending the party's legality is to participate wherever possible in elections. The excellent election campaigns at present being conducted by our New York and Newark organizations are an example of what can be done in this period. We must record the fact that too often in the past we have neglected electoral activity. We must now give primary attention to participating under our own name and with our own candidate in election fights. This will serve not only to bring our program before the masses, but render more difficult the government's attempt to repress us.

**Plenum Greetings Sent** To Natalia Trotsky

The following is the message of solidarity sent to Natalia Sedov Trotsky in Coyoacan, Mexico, by the National Plenum-Conference of the Socialist Workers Party, meeting October 11-12 in Chicago, Illinois:

"We are closing this evening the best attended and most enthusiastic conference in our history. The unanimous vote on the political resolution which is based on the life teachings of Comrade Leon Trotsky expressed our firm unity. As we successfully conclude our work, we send you our warmest comradely greetings.

C. CHARLES, Chairman of Session, Plenum-Conference Socialist Workers Party"

united with these rightward-moving centrists in the illusory hope of gaining strength by numbers, our forces would have been weakened, not strengthened. When actual opportunities for unity on a sound basis did occur, with the American Workers Party (1935) and with the left wing of the Socialist Party (1936-1937) we proved able, thanks to our programmatic firmness, to take full advantage of the opportunities to strengthen the revolutionary ranks. This can be the case also in the future with groups of Stalinist workers who turn toward the revolutionary road. The condition for a fruitful intervention on our part in a revolutionary development among the Stalinist workers, or the political awakening of any other group of serious workers, is the prohibition in our own ranks of any sentiment of conciliation toward the degenerate petty-bourgeois clique of Shachtman and Co.

#### THE STRUGGLE AGAINST WAR AND FASCISM

9. The struggle against the imperialist war overshadows all other questions. The country is being maneuvered into war by the American imperialists and their government, and the labor bureaucracy is successfully throttling any mass labor opposition. Revolutionary Marxism has always recognized that the struggle against imperialist war is identical with the struggle against capitalism, and that the only way to do away with war is to do away with the capitalist order. This fundamental conception is confirmed by the way in which, despite the desires of the overwhelming majority of the country, the capitalist regime is succeeding in dragging the country into war. Only by the overthrow of capitalism, by the establishment of a Workers and Farmers Government, can this country be led out of the war to a peace based on socialism.

10. Our Proletarian Military Policy, adopted by our last Plenum-Conference (September 23-27, 1940) will provide the practical basis for agitation when "shooting war" begins. To the demand of the chauvinists in the labor movement that the country must be defended against fascism, we answer that the best way to defend the working class against both foreign and domestic fascists is through military training under control of the trade unions. We do not place any trust in the "anti-fascist" pretensions of the capitalist government. Only the working class can smash fascism. We do not trust the reactionary officer caste. We demand federal appropriations for military training camps to be operated under the control of the trade unions, and special officers' training camps operated under the control of the trade unions where workers can be trained as officers. Our Proletarian Military Policy serves to educate the workers, to bridge the gap between their present confused but anti-fascist sentiments and our program for the extirpation of fascism and its capitalist roots. The Plenum-Conference instructs the National Committee to republish in pamphlet form our Resolution and other published material on Proletarian Military Policy and to conduct a systematic agitation to popularize it.

#### TASKS IN THE TRADE UNIONS

11. As the war develops, ever more significant will become the struggle for the independence of the trade unions in relation to the capitalist state and the struggle for trade union democracy.

Throughout the world, in all the capitalist countries during the period since the first World War, we have seen a "growing together" of the state with the trade unions. Whether "neutral", Social-Democratic, Stalinist, or Anarchist, the trade union leadership has adapted itself to the capitalist state and seeks its cooperation. In the eyes of the trade union bureaucracy, the chief task of the unions lies in the utopian program of "freeing" the capitalist state from the embrace of capitalism and pulling the state over to the side of the labor bureaucracy. This has happened also in America, to both the CIO and AFL. Through the NLRB, the National Defense Mediation Board, federal conciliators, etc., close links have been forged between the state power and the trade union bureaucracy. An integral part of this tendency are the steps taken jointly by the government and the labor bureaucracy to wipe out in the unions all forms of trade union democracy and to expel all revolutionists from the unions. These are the only conditions under which monopoly capitalism, with its centralized command both in economic life and government, can permit the continued existence of the trade unions. Thus the struggle for independence of the trade unions and for trade union democracy becomes increasingly a struggle which only the revolutionist can lead.

The trade unions of our time can either serve as instruments of imperialist capitalism for the subordination and disciplining of workers or, on the contrary, the trade unions can become instruments of the revolutionary movement of the proletariat. No third alternative is open to the trade unions in this epoch. The neutrality of the trade unions toward the capitalist state is completely and irretrievably a thing of the past, gone together with traditional bourgeois democracy.

The struggle in the trade unions is essentially a struggle for influence over the working class. Despite the tendency toward degeneration of the trade unions and their 'growing together' with the imperialist state, our work within the trade unions becomes even more important than before. For the trade unions remain the main arena in which the revolutionist can contend with the agents of the bourgeoisie for the leadership of the working class. The agents of the bourgeoisie cannot but appear henceforth as exponents of state domination of the unions and opponents of trade union democracy. We become the banner bearers for the freedom of the unions and for workers' democracy within the unions. Precisely because monopoly capitalism is less and less willing to reconcile itself to the independence of trade unions, the labor agents of monopoly capitalism will become less and less able to maintain their influence over the great masses in the unions. That is why we shall succeed in proving our right to the leadership of the trade unions as defenders of trade union independence and trade union democracy.

### INTERNAL PREPARATION OF THE PARTY

5. An intensive campaign is required for the internal preparation of the party to withstand the blow of the federal prosecution. The only people who can stand up under this kind of governmental pressure are people who have an historical outlook and a profound understanding of what they are fighting for. Mere activism, sometimes sufficient for day to day work, is not enough to stand up under the blows of persecution. We have on this score the negative example of the I.W.W. cadres after the last war. Out of 150 or more I.W.W. men who went to Leavenworth, only a small handful retained their activity in the movement afterward. This was not because they were poor material; they were genuine militants, very courageous people. But they lacked the theoretical equipment to comprehend the complexities of the war situation. The philosophy of the I.W.W. proved inadequate to sustain them and they fell by the wayside. The difference between a trade union militant and a politically educated Trotskyist is immeasurable; it is qualitative. The best of yesterday's trade union militants are today succumbing under the pressure of the war situation. Only those will survive who are not only rooted in the working class movement but who have the Marxist outlook to see beyond the present difficulties to the

6. The revolutionary party, in order to successfully meet all serious tests, requires such an education of the party members and such a selection of its leading people that the party can remain firm under all conditions. This requires high standards for party membership: standards of activity, of discipline, of financial contributions, of devotion to learning the history and theory of the movement, etc. It requires even higher standards for its leading staff. The party which aims at the conquest of power for the socialist transformation of society cannot operate with casual members and dilletante members. Members and leaders alike must conduct themselves as disciplined soldiers in the army of the proletarian revolution. Leaders must set the example of communist devotion, loyalty and discipline.

Systematic education of the party is dictated by the needs for new party leadership. New cadres may have to take the place of imprisoned comrades. The new opportunities open to the party demand an expansion of the leadership of the party. Given new responsibilities, comrades hitherto unnoticed will prove themselves worthy of positions of leadership. Under the test of fire, new leaders will come forward.

7. The Plenum-Conference calls the attention of all party members to the necessity for systematic political work and recruiting for the party in the factories, the shops and in the unions. In the previous period we have successfully carried through an extensive movement in the party to integrate our young comrades in industry and in the unions. In that period

of penetration into the factories and unions, it was necessary to caution young comrades not to be too precipitate in their partypolitical activity until they had firmly established themselves in their new environment. This campaign has been carried through successfully. We have radically changed the character of the composition of the party. Today we can say that the average member of the party is a trade unionist. However, having succeeded in integrating themselves into industry, and the trade union movement, our comrades are now entering a new stage in their work. A type of activity that does not rise above trade union levels cannot be a permanent task. Once the comrades are integrated in the unions they must begin serious and systematic party-political work.

Mere trade union work, in itself, does not amount to much especially in this epoch of wars and revolutions. We have to begin recruiting for the party. This can only be done if the party fractions work systematically and regularly. There are no exceptions to this law. All comrades, wherever there are two or more together, must work as a fraction. The aim of fraction work is not merely the working out of positions on the "high politics" of the unions but, more concretely, the task of teachng fellow workers and union brothers the principles and great goal of communism and recruiting them into the party.

#### AGAINST CONCILIATION WITH RENEGADES

8. Our party must be absolutely unrelenting in its warfare against any existing or arising centrist groups (Shachtmanites, etc.) Lenin, never much of a unity shouter, became especially intransigent during the first world war as the fundamental cleavage between the Bolsheviks and the Mensheviks revealed itself more clearly. So now must we maintain the cohesion of the genuine revolutionists during this war. Trotsky said the fight between the proletarian majority of the party and the petty-bourgeois opposition was similar in many respects to the historical struggle between the Bolsheviks and the Mensheviks in the Russian movement. In justice to the Russian Mensheviks, Trotsky also said, they appear as revolutionary heroes in comparison with the wretched faction of Burnham, Shachtman and Co.

We must educate cadres who are not afraid of isolation and who do not seek fictitious strength through numbers at the expense of programmatic clarity. There are many members of the party who did not live through the experiences of our intransigent programmatic fight in isolation (1928-1934). That isolation was dictated by the necessity to consolidate the revolutionary nucleus on the basis of a program. Ill-considered "unity" maneuvers could only have compromised this basic task. The Lovestoneites in those years approached us again and again for "united fronts", "common action", etc., as a bridge to unity. Had we

### FOR DEFENSE OF THE SOVIET UNION

imperialism and its consequences is already meeting with interest and response in the ranks of the Stalinists. The catastrophic consequences of Stalinist leadership in the Nazi-Soviet war must increase the present ferment among the workers hitherto influenced by Stalinism. The Stalinist move toward a united front with Hillman and the AFL bureaucracy against all opponents of Roosevelt's war program is extremely distasteful to the many Communist Party militants who see no reason to change their opinion about Hillman, William Green and Co. The further consequences of the Roosevelt war program - strike-breaking, attempts to place a ceiling on wages, priorities unemployment, etc. — will make the Stalinist line increasingly repugnant to the thousands of genuine militants whom the Communist party still has within its ranks. These militants will find in us, if we only take the trouble to reach them, the revolutionary alternative to

13. Our program for revolutionary defense of the Soviet Union has made its way into the Stalinist ranks despite all the frantic attempts of the Kremlin's hirelings to portray us as enemies of the Soviet Union. Only our program explains to the perplexed Stalinist workers why, despite all the heroism and the superior morale of the Red Army and Soviet masses, the Nazi war machine has continued to win victories over the Soviet Union. Trotsky's analysis explains to these workers how Stalin beheaded the Red Army and left the Soviet Union leaders in industry and agriculture; every day's headlines only confirm the Trotskyist

12. Our struggle against the war program of American contention that Stalinism is incapable of defending the Soviet Union. Only our analysis of the anti-revolutionary character of Stalinism explains to the workers why the Kremlin has refused to arouse the masses of Europe and undermine Hitler in Germany by the revolutionary weapons which Lenin and Trotsky so successfully employed in 1917-1920.

When the workers now under Stalinist influence realize the extent of the continuous defeats sustained by the Soviet Union, there is great danger that they will fall into despair and passivity, for they will be unable to explain to themselves why the workers state is unable to defend itself successfully against a fascist regime. Unless these workers are reached in time by us, their disillusionment may lead them to drop out of the revolutionary movement altogether. We have the urgent task of saving these workers for the revolutionary movement by preparing them ideologically in due

14. Our program for the revolutionary defense of the Soviet Union has been confirmed not only against the Stalinists, but also against all the petty-bourgeois renegades who denied the Soviet Union its character as a workers state and who refused to defend it. The unparalleled morale with which the Red Army and the Soviet Union masses rallied to the defense of the workers state can only be explained by our analysis of the class character of the Soviet Union. The Soviet masses, despite the oppression which they are under from the Kremlin bureaucracy, proved to be wiser politically than the "cultured" petty-bourgeois snobs who abandoned the Soviet Union; the masses were able to distinguish between the Soviet Union and Stalinism even if the Eastmans, Hooks, Burnhams and Shachtmans did not. The Soviet masses threw themselves into the struggle against the Nazi war machine as no "democratic" country - France, England, Czechoslovakia, Norway, etc. - has been able to. The Soviet masses understood that Hitler was attacking, not merely the Kremlin, but the nationalized property established by the October revolution. That this unprecedented upsurge of morale has proved insufficient to halt the Nazi war machine is a tragic confirmation of the fact that only under a revolutionary leadership can the workers state be saved. But if the Soviet Union should fall, that loss will only crown the crimes of the petty-bourgeois renegades who turned their backs on the Soviet Union in its hour

15. The history of the last two decades demonstrates that the American working class will have its chance to conquer state power before the rise of a mass fascist movement. The rise of fascism and its seizure of power has occurred only where the conservative labor parties (Social-Democratic and Stalinist) prevented the proletariat from utilizing a revolutionary situation. But first came revolutionary situations in Italy (1919-1921) and Germany (1918-19, 1923-24, 1929-31). Only when the workers' parties failed to lead society out of the impasse did it become possible for the fascists to recruit mass movements with which to crush the workers' organizations. This is the historical law which is demonstrated by the history of this epoch of wars and

And this law provides the answer to the question whether fascism can be prevented by the American working class. Fascism can and will be prevented by the building of a strong revolutionary party able to to utilize the revolutionary opportunity. That is the great historic task of the Socialist Workers Party. We shall have our chance. And we shall not miss it.

## A Farewell To Grant Dunne -- Worker-Warrior

## "We Shall Write His Name On The Banner Of His Union And His Party", Says Dobbs In Funeral Address

(Speech of Farrell Dobbs, National Labor Secretary, S.W.P., A Victim of Capitalism, in Peace and War at the funeral of Grant Dunne, Minneapolis, October 7, 1941).

Grant John Dunne was born June 21, 1893, on a farm east of Little Falls, Minnesota. He went through eighth grade in a one-room schoolhouse in the country. Soon after the turn of the century the Dunne family moved to Minneapolis. Grant went to South High school for one year, and then, like so many sons of the working class, had to forego schooling and go to work. He got his first job as a bill clerk for the Railway Express company. During the next few years he held various jobs in Minneapolis.

On February 6, 1918, he was married to Clara Houck. They had four sons, Claire, John, Richard and Russell. Five months after his marriage Grant was inducted into the 3rd Pioneer Infantry, and one month later he found himself in the frontline trenches in France.

His first great lesson in life he learned from the imperialist war, which broke up his life, took him from his wife who was with their first son, and propelled him, untrained, into the maelstrom of war. Grant served in the front line at the Argonne sector from September 26, 1918, to the Armistice.

On the very eve of the Armistice he was transporting munitions to the front lines when he was caught with other soldiers in a terrific explosion at an ammunition dump. Grant sustained a severe case of shellshock. He was hospitalized in France and brought back to the United States on a stretcher.

On October 21, 1919, Grant was released from Fort Snelling with an honorable discharge. His recovery from his war wounds was slow, and he suffered many relapses, especially in the last year of his life when the existence of another World War brought back to him the sufferings he saw and experienced in the first World War.

In 1920 he obtained employment as an office worker in Minneapolis. He was very conscious of the fact that his lack of formal schooling was a handicap, and he took up the task of self-education. Discovering a talent for figures, he immersed himself in the study of mathematics. Later he entered the construction industry, working his way up to the post of executive secretary of a large construction firm, then serving the firm as branch manager in St. Louis and Washington, D. C. Still later, he was employed as an expert estimator with a plumbing supply company in St. Louis, where his expert knowledge of the industry was frequently consulted by others.

Then came the economic crash of 1929. Grant, like millions. of other persons, was thrown into the ranks of the unemployed. In 1918 he had been a victim of the first imperialist World War. In 1929 he became an economic victim of that same system that brought about the First and Second World Wars. He searched everywhere for work, but no work was to be found.

In 1931 he brought his family back to Minneapolis. Their savings were gone. The family went on relief.

How did it come about that he and millions of others wanted to work but could find no work to perform? Grant asked himself this question. He again applied himself to study. He found the system of capitalism to be responsible for the great ills of mankind. He found the answer in the working-class movement. He came to understand the need for trade unions and for trade union struggle. He came to see the necessity for working-class political action. Fearlessly he threw himself into the task of building the union movement, of strengthening the workers' political movement. He devoted the remainder of his years to these tasks. He helped other workers find the solution to their problems.

In 1933 Grant finally landed a job as coal driver. He applied his knowledge. He was one of the pioneers who helped launch the campaign to organize the Minneapolis drivers, who helped build that organization which later came to be known

#### A Fearless Fighter for Labor

There is scarcely a worker in the city of Minneapolis today who can compare his present wages and conditions with those existing in 1933, without realizing that he has bettered himself to some extent, in some way, thanks to the far-reaching results of the work of Local 574 and later Local 544. The great drivers' strikes of 1934 drove the Citizens Alliance back into the shadows and lifted the workers to their feet. Grant played a big part in the successful organization of the drivers. Seldom in the forefront, so far as the public was concerned, Grant made heavy contributions to his union. He served it as a skillful organizer. He was especially versatile in committee work. He played a brilliant role in presenting testimony on the workers' movement and the needs of the workers and the unemployed,

#### SWP Sends Expression of Sympathy to Clara Dunne

The following is the message of condolence wired to Clara Dunne, widow of Grant Dunne, by the National Plenum-Conference of the Socialist Workers Party held in Chicago last week-

"As we mobilize for the struggle against the Roosevelt-Tobin persecution, we honor the memory of Grant Dunne, proletarian warrior who fell victim to capitalist persecution. We share your sorrow and grieve with your four sons who have lost their father. We stand ready to do all we can to comfort and help you who have been the lifelong companion of our fallen comrade."

to various governmental bodies in Washington. For years he served the Federal Workers Section as its assistant from the General Drivers Union.

Grant would always rise to his fullest stature at the time when his organization was facing its greatest crises.

In the summer of 1934, when Governor Olson's national guards were on the streets of Minneapolis, were turning loose the trucks with military permits, were breaking our strike, raiding our strike headquarters, arresting our leaders and our pickets, Grant more than any other person helped turn the tide of battle. He appeared before the governor and before the colonels, forcing the release of the arrested union leaders, forcing the guardsmen to evacuate the union headquarters.

All during these years Grant suffered periodically from his war wounds. Often it was hard and sometimes impossible for him to function.

Grant did the greatest individual service for me that anyone ever performed. He picked me out from behind a coal pile in 1933, where I was shoveling coal for 35c an hour, bewildered and confused by life. Grant set my feet on the high road of the workers' political movement.

#### Grant Dunne's Greatest Contribution

Grant has started hundreds of other workers on this same path, the only path that leads to the ultimate solution of all our major problems. Grant has opened the eyes of hundreds to the realities of our economic and political system. Through these men Grant Dunne will continue to serve the workers' movement until the final victory is won. This is his greatest contribution to humanity.

In recent years, Grant has seen the world again enveloped in another bloody war caused by the forces of imperialism. He has seen the heavy hands of Roosevelt press on the workingclass, smashing at every element of militancy in the movement, driving the masses into war.

Grant had seen the deep injustices committed against his union by Governor Stassen. He had observed the jackal role played by Tobin, betraying the workers as he always has.

Grant saw all the young men of the present generation being shoved into the maw of the war machine. He saw the Roosevelt administration lashing out against the union that Grant belonged to and against the party, the Socialist Workers Party, that Grant belonged to. He saw himself one of the victims of the vicious witch hunts that always precede and accompany imperialist war. The government and the union bureaucrats were persecuting, in Grant, a man who was himself a victim of the First World War.

As Grant saw the approach of America's entrance into the bloody struggle for markets and colonies and profits, he looked upon his three sons of military age. He thought of the suffering this war might bring to them, as the earlier war had brought to him. He saw his first-born, Claire, a war baby, now grown and about ready to march off to another war.

These sad burdens aggravated the wounds inflicted upon him in mind and body at the Argonne. All of this was more than he could bear.

We are gathered here to say our last farewell to Grant Dunne. We shall cherish his memory. We shall love him for the good he has done. Grant gave all that he had to give to the cause that meant more to him than life itself. He risked his life many times without giving it a second thought. He was a good fighter.

We shall write his name on the banner of his union and his party. And here at his funeral let us strike up once again the forward march to carry that banner onward — in spite of everything — to the final victory of the workers and the free world of emancipated labor.

## Canadian Labor Fights War Repression

#### Strike Struggles Answer Attempts of Boss Government to Beat Down Workers' Unions

CANADA — Despite the growing severity of government attempts at repression, in the past six months Canadian labor has made notable headway in cracking the boss front. Strikes are flaring up and spreading. The Canadian workers are once again, as in the days of the Winnipeg Soviets after the last war, awakening to their power. The tremendous demand for labor to operate the new British-American subsidized war industries has given the workers a

ten years of unparalleled unem- unions. ployment and misery.

untouched by unionism are being large and militant strikes withorganized. This development is in recent months. specially significant because campaign of the bosses and the rigorous anti-labor measures of the government.

Catherines, Hamilton, Nova Scotia, and elsewhere, who have been on strike within the recent period, have no constitutional guarantees of any sort to protect is supposed to afford the workers | bers. in the United States. Although the American government overrides the Bill of Rights and the Declaration of Independence, as in the present prosecution of the Socialist Workers Party in Minnesota, still these documents do exist and their principles are at least formally recognized. Canadian labor has rights only to the extent that it can gain them in day-to-day struggle.

#### INDUSTRIAL DISPUTES ACT

Since the outbreak of the war. the Canadian government has put into effect a number of oppressive laws aimed at ham-stringing labor. One of the harshest of these is the Industrial Disputes Act now applicable to all vital services, "vital services" being interpreted to cover virtually all

Not only must the workers, under this act, arbitrate before taking strike action, but they cannot even apply for arbitration before a conciliation board until they do take a strike vote. By this device, the unions are blocked from getting any consideration for their demands except when they commit themselves in advance to strike action.

This compulsory procedure goes a long way toward blocking strikes. It permits the conciliation boards to dawdle and delay often three and four months in their decisions, long enough for is but one of many similar strikes MORE REPRESSIONS the bosses to exert their influence to demoralize the workers, against the most militant union occurred over the question of by way of bribing the weaker in-

> On April 19, the board issued an interim report recommending rates of 40 to 46 cents an hour the reinstatement of the union local's president, pending a final reinstatement, and the workers went out on strike April 26.

The government immediately intervened and appointed a controller over the plant. The controller reinstated the fired unionists and the strike was called

#### WON'T NEGOTIATE WITH ANY UNION

But the government controller refused to negotiate with the union, just as the employers had, in spite of a government Orderin- Council directing employers to

\*The conciliation board, on July 2, finally issued a statement to the effect that "the controller advised the board he would not enter into any negotiations or collective bargaining with any union, but stated he would ask the employees to appoint a representative committee."

This had all the odor of an attempt to establish a company union committee. So the workers again went out on strike. To avert further trouble, the government was forced this month to appoint a new controller and continue arbitration. But the powder keg remains primed.

> The basic pay-rate at the Peck Mills was 30.7 cents an hour, with 15 cents a day bonus. Fifty per cent of the workers were earning 32 cents an hour or less. This was in contrast with the

id for the same type of work in plants of other concerns, and award. The bosses refused the even in plants of the same concern in Ontario and Nova Scotia. The conciliation board found

that 32 cents an hour was higher than what was paid in the same plant in the 1926-29 period and therefore ruled against any raise in pay for the Peck Mills workers.

Sometimes, however, the government has been unable to aid the employers within the limits of this law. It then has to introduce further measures to reinforce any weak spots in its anti-labor legal armor.

This is illustrated by the government's actions in the McKinnon Industries strike at St. Catherines. The McKinnon Industries is a General Motors subsidiary but the St. Catherines workers were receiving wages much below wages paid GM employes in the Oshawa and Windsor plants, and as much as 20 cents an hour less than workers get in GM's American plants.

After going through all the long drawn-out procedure of arbitration required by law, the St. Catherines workers went out on strike. As a result of material shortages, the Oshawa GM plant discontinued operations, laying off 5,000 workers.

#### Canadian Gov't Deports CIO Officer

The Canadian government is all for "international solidarity" when it comes to supporting the war alliance of American and British imperialism. But its hatred of international working-class solidarity has no bounds.

The CIO NEWS, October 13, reports that CIO Vice-president Reid Robinson, head of the Int'l Union of Mine, Mill & Smelter Workers, was arrested in Toronto, Canada, while en route to address a union meeting at Kirkland Lake, and on October 9 was ordered deported from Canada.

Reid Robinson "was virtually shanghaied by Canadian immigration officials and thrown into the governor's dungeon at Toronto," reports the CIO NEWS, and adds:

"Refusing to let him communicate with his union or with a lawyer, the Canadian officials stripped and searched him, then threw him into a cell with 17 drunks."

Although the Minister of Labor has stated that this ed to do the dirty work. The measure is intended to prevent one department or a small group of "malcontents" (union men) from tying up a whole plant, the of a threatened curtailment of order-in-council permits a much production in any war industry. broader interpretation, which will no doubt be used against the workers. Incidentally, all workers who are absent from the voting are considered by the government

sulted from the effort of the gov- government takes a vote of all terned in a concentration camp

#### ALUMINUM STRIKE

9,000 workers at Arvida, employed in the largest aluminum plant in the world, recently went on strike for five days. Not a scrap of news appeared about the plant was completely shut

The Arvida workers escaped the penalties imposed on the General Electric workers only because the Royal Canadian Mounted Police were unable to pin responsibility for "inciting" the strike on any individuals.

At a Royal Commission held to investigate the Arvida stoppage, the RCMP was unable to substantiate an accusation of the Minister of Supply that the strike was the result of sabotage and "fifth column" activity. This was an apparently spontaneous strike, since there was no union involved. The workers in the plant took the entire initiative in the action. Moreover, it was shown that 18 per cent of the strikers had been tional Catholic Syndicate of Aluminum Workers.

In this strike, Dominion troops from the Valcartier military camp were used against the strikers. Neither Premier Godbout of Quebec nor Minister of Justice Lapointe at Ottawa dared send in the provincial or federal police for fear of alienating the French-Canadian population by use of force against French-Can-

strengthened their monopoly. Judge Caffey used a flimsy le gal trick of dividing the charges into 36 sections, and then crassly asserted that the vast mass of evidence against Alcoa was not definite enough on any one spe-

cific charge. But the facts of the matter are: Alcoa, headed by Arthur V. Davis, and Aluminum, Ltd. of Canada, manned by his brother, have since their foundation in 1895 maintained a complete monopoly of raw materials, patents and water power rights for production of aluminum. They secured the passage of a tariff law to maintain their monopoly.

They own foreign aluminum companies and dominate foreign sources of bauxite (the mineral raw material of aluminum). They tional cartel to divide the world competitors in such a way as to

They have spent millions of dollars in propaganda, bribery and pressure to prevent competition, to continue control of important water power facilities. They have consistently maintained a high price for aluminum and restricted the quantity produced

Yet the tons of factual materials and testimony which were adduced to prove this were all thrown out the window by Judge Caffey. Thus the courts do ser-

#### ONLY PROFITS INTEREST ALCOA

pects of this trial against Alcoa is ment. In the past several years, the vast majority of the Amershow that Alcoa was a monopoly, class war against fascism.

Stettinius and other "dollar-ayear" men were issuing lying statements to cover up the threatening aluminum shortage.

At a time when American capitalism is spending billions of dollars for war materials, the Alcoa policy of restricting output

The Truman Committee of the Senate unearthed additional information to prove this. As the liberal correspondent I. F. Stone

"The testimony before the Truman Committee showed that the Defense Commission, and later the OPM, seem to have done their best to help Aluminum Company hide the true situation from the country and to prevent the government or other business concerns from going into the production of

aluminum."

Stone is interested in helping the imperialist war plans as much as possible. But what is important from a working class standpoint is that the very profitmongering handful of capitalists, which is seeking to drag the country into the imperialist war, sabotages its own war efforts by pursuing a policy of choking production in the interest of monopolistic super profits.

Just as in the case of France, where the aluminum companies were selling tons of aluminum to Germany for the production of bombing planes, so here too the big capitalists demonstrate that they are not interested in fighting fascism, but are only interested in profits for war materials. and waging the war for more

Thus the action of the court in whitewashing Alcoa and its policies only gives further proof of how the big capitalists run the country and use the courts and press to do their bidding, in their own interests.

It is further proof that the only real way, the only successful way to smash fascism is for the American workers and farm-One of the most important as- ers to throw out this small hand-

## The Cannot Emancipate ITSELY WHERE LABOR WITH A BLACK SKIN IS BRANDED - KARL

### Negro Struggle

By ALBERT PARKER

#### Stalinist Propaganda

Our comrades in Newark, N. J., have sent us a copy of a leaflet issued by the Communist Party in that city, entitled "A United America Can Defeat Hitler" and addressed primarily to the Negro people.

In it the Stalinists follow the example set by the warmongering politicians who have taken advantage of Lindbergh's Jew-baiting speech in Des Moines to try to make the war-mongers appear as advocates of racial equality and equal opportunity.

But, as in many other fields, the Stalinist propaganda is so crude and obvious in this leaflet, which is quite typical of most Stalinist propaganda, that it gives their game away completely.

"One look at Hitler's friends in this country shows that they are also the preachers of hatred for the Negro people. Lindbergh and his pals are spreading the phony 'racial' theories which Hitler has spread over Germany. . . It is no accident that Southern politicians like Senator Reynolds have lined up with Hitler. They see eye to eye."

Now certainly Reynolds is an enemy of the Negro people and of the whole labor movement. He has for many years been associated with the red-baiting opponents of the trade unions, and was the organizer of a super-"patriotic" movement known as the "Vindicators" which spent most of its energy whipping up attacks on foreign-born workers. But in these respects there is nothing to distinguish him from most of the other politicians from the poll-tax states of the

There is only one thing that distinguishes him from the other Southern congressman, and that is that he belongs to the "isolationist" group, rather than the interventionist. At the present time, he is willing, for the sake of building up a pro-American fascist movement now and after the war, to exploit the honest anti-war sentiments of the masses. He is of course no real fighter against war; he stands wholeheartedly for the preservation of the system of capitalism which causes war.

But when the Stalinists speak about Reynolds, workers will naturally ask themselves, "What about the other Southern politicians who do not pretend to be opponents of the war, who are as a matter of fact, the most rabid advocates of the war program in Washington? Where do they stand on the racial question? With whom do they see eye to eye?"

The answer, of course, is well-known to the Stalinists, who published it hundreds of times only a few months ago when they were still opposed to the Roosevelt war program.

#### The Warmongers And the Negroes

Who are these other Southern politicians who are howling for the war? They are, almost to a man, cut in the mold of Pepper, Dies, Connally, et al. They are men who are elected year after year only because they deny the great mass of the workers, Negro and white, the right to vote. They are the men who by threat of filibuster and other kinds of pressure have prevented any kind of anti-lynch legislation from being enacted by

Only recently, Pepper, that great advocate of a "war for democracy", arose on the floor of the United States Senate to declare:

"Whatever may be written into the Constitution, whatever may be placed upon the statute books of this nation, however many soldiers may be stationed about the ballot boxes of the Southland, the colored race will not vote."

What do the Southern warmongers think about the Jim Crow laws of the South? What do they think about the laws and customs that segregate the Negro people in jobs, in church, in the armed forces, in every economic and social sphere and excludes them completely from participation in politics?

To ask these questions is to anwer them. These pro-war Southern politicians not only strengthen and bolster segregation, but they are ready to stage another civil war if any serious attempt is made to destroy Jim Crowism. They did this long before the name of Hitler was heard of in this country. They intend to continue it long after Hitler is gone and forgotten.

These people see eye to eye with Hitler too, or perhaps it is more correct to say that Hitler sees eye to eye with them. Not on the war, it is true, but certainly on racial questions. To paraphrase the Stalinists, "one look at Hitler's" imperialist enemies "in this country shows that they are also the preachers of hatred for the Negro people." In this respect there is no difference whatever between them and men like Reynolds.

The Stalinists try to get support for the war by showing that the "isolationists" are enemies of the Negro people. That this is a false way of posing the question is shown by the fact that the interventionists are no less enemies of the Negro people.

Only we, the Trotskyists, can speak the truth on this question. We are opposed to all the enemies of the Negro people, and we don't have to try to defend any of them.

We cite their records not to win support for a reactionary position, as the Stalinists do, but to show the hypocrisy behind their protestations about democracy and racial equality, and to show how the Stalinists serve the cause of a certain section of the enemies of the Negro people.

## Famous American Labor Trials

## STATE OF CALIFORNIA VERSUS MOONEY AND BILLINGS

By Lydia Beidel-

THOMAS J. MOONEY WARREN K. BILLINGS

Sentenced at San Francisco in Jan., 1917, to death and sluiced down the sewers every against "labor terrorists" and son; two religious maniacs with for Mooney and life imprisonment for Billings.

BACKGROUND OF THE CASE

verged on war. Wilson had been of the guiding slogan to symbolre-elected to the presidency on a ize the "noble" work: "If a law- Pinkerton man employed at the pacifist program, but the Amer- abiding workingman is beaten up, ican invasion of Mexico to pro- then beat up two strikers!" tect American oil interests indidrives; flourishing business for Parade." strike-breaking agencies. The "American Plan" — a fancy term for a national open-shop policy - was pushed by boss agencies.

San Francisco was the scene of labor upsurge. Strikes tied up the waterfront, restaurants, automobile machine shops. The Chamber of Commerce at once raised the "Red" issue and a howl went up for an assault upon labor unionism. This howl emanated loudest from the mouths of the owners of United Railroads controllers of San Francisco traffic — and allied electric-power interests, among whose employees a campaign of union organization was going forward.

Charles M. Fickert, a profane, obscene, vicious ignoramus whose had enabled him to advance from strike-breaking in the San Franas public prosecutor by United Railroad money.

determined, for, at 3:30, the police was set for six weeks later. The of a charity lodging house who weak-minded derelict who was later condemned by another cour as a "psychopathic liar."

The cream of the crop, however and the star witness for the state, was one Frank C. Oxman, an "honest Oregon cattleman" whose ance and homely drawl seemed the very essence of unimpeachable integrity. He claimed he not only saw Mooney and Billings and the rest get out of a taxi and place a suitcase against the wall of a building, but he evenwith a foresight evidently peculiar to Oregon cattlemen - took the license number of the tax:: it was, "of course", Weinberg's

Oxman's testimony cinched the case. The jury took it and shortly returned with a verdict of guilty punishable by death by

Hardly had the echo of the sentence died when Oxman was disclosed as a perjurer of the highest order. Not only had h. not seen the bombing, but he had been actually in Woodland, California until nine minutes after the explosion occurred. He had done his best to persuade a friend to perjure himself by substantiating his story but the friend had declined. It was this friend's horror at the verdict that made him denounce Oxman. The labor unions of Illinois (where the friend lived) took up the fight to disclose Oxman's criminality and led the fight to have the man tried and convicted of subornation of perjury and perjury.

Rena Mooney, Nolan and Weinberg were released finally after spending a year or more in prison without having been convicted.

#### WORLD PROTEST

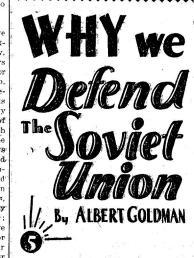

Now began the twenty-one-year struggle of organized labor in every part of the world to open the jail door for Mooney and Billings. So loud and demonstrative protest rose immediately upon the convictions that first the governor of California, was forced to issue a reprieve of Mooney s death sentence from October to December 13, 1918 and later to commute the sentence to life imprisonment.

President Wilson was forced to intercede for clemency since the case had; as he put it, "assumed an international importance." Two government commissions were appointed to review the case and each reported that the evidence did not warrant conviction. All attempts on the part of the defense to have the case reversed or to effect a pardon met with failure. As in the Sacco and Vanzetti cases to follow, the bourgeois state machine was stubborn in its determination not to permit labor to win a victory.

#### THE PARDONS

By 1938 the Mooney-Billings case had become so outstanding an issue that the gubernatorial elections in California featured promises made by the candidates concerning their behavior toward the two famous prisoners if they were elected. Culbert L. Olson, who was elected, had promised that the release of American labor's two most famous living prisoners would be one of his first administrative acts. On January , 1939, Mooney left his prison cell, followed on October 17, by his fellow worker, Billings.

Thus did Mooney and Billings, victims of the anti-labor, pro-war bosses in World War I, finally gain their freedom on the eve of World War II.

## Petty Bourgeois **Opposition Shows** Its Bankruptcy

By JACK WEBER

It would be hard to find a more bewildered group of individuals today than those who split away from the Socialist Workers Party to form their own little organization, the so-called Workers Party. The September issue of their theoretical organ, the New International, contains a "Manifesto" on the War in Russia. We call attention to it here in order to illustrate once again the utter political bankruptcy which results when events catch up with utterly false theories.

You will look in vain for any explanation of the war in terms of "Russian imperialism", or Stalinist "imperialism", the "idea" that motivated this group to form its own party. Forced to recognize: the most obvious facts, the manifesto waxes almost lyrical concerning the fight of the masses against fascism. This, we are told takes place in spite of Stalin and all his works. But the Lebruns and Co. are not to be moved!

The main question that faces every conscious political person at the present time is: what stand should be taken on the war? In a manifesto devoted to the war in Russia, surely one would expect a simple, clear answer to this simple clear question. In truth, however, the manifesto is written precisely with an eye to evading this question, and to suit all-comers.

"Whatever may be the end of the Russo-German war, the regime of the Stalinist burocracy is doomed. Russian victory against Hitler would only be made possible by a profound revolution of the masses and the consequent restoration of the conquests of October and of the rights and benefits to the Russian working class that the Bolshevik revolution sought to give them in its beginning." And prior to this statement we have: "In the Soviet Union, more than in any other country, victory in case of war will be assured mainly by the power of its ideals, by the international solidarity of the workers, by the revolutionary prospects in other countries, and not by the Russian guns, tanks and planes alone." But for reasons that are clear only to the WP, Stalin alone is made custodian of the revolutionary process. "These ideological weapons have been squandered by Stalin." Hence we must discard a

#### The "Logic" of the Petty-Bourgeosie

One would suppose that with these as the premises for Soviet victory, there could be no two choices in the matter: one must be for the victory of the Soviet Union at all costs, for even with victory Stalin is doomed. Shall we at least make the effort to meet these conditions for the advance of the workers' revolution? We quote the logic of the manifesto on this crucial point. We have omitted no step in the reasoning, nothing is left out. "If this fails to come, what the Soviet Union may expect is defeat by Hitler's guns or, possibly, dismemberment even in case of an Allied victory. There is therefore no place in this war for defense of the present Soviet regime under Stalin's dictatorship". How did this conclusion sneak in?

Truth to tell, the writer forgets what he wrote from one sentence to the next. Having been informed that the Stalin regime is doomed no matter what the outcome of the war, we go back and read this interesting bit of argumentation: "If the bureaucratic gang were able to go through the whole process of the present war uninjured, then the establishment of a new social class, based on a collective form of property, would be the clearly visible culmination of Russia's political and economic evolution." This cannot be.

Nevertheless, the writer then bases his conclusions on precisely this bit of conditional reasoning that simply cannot be. Hitler's victory will accomplish (for the working class, if the writer is to be understood) one great progressive task; namely, the destruction of the Stalinist totalitarian regime.

#### The End-Product of Soviet Defeatism

When it comes to obscurantism, the writer of the manifesto yields nothing to Hitler. Covered over under these phrases is the desirability of a Russian defeat because it will overthrow the Stalinist regime. One would suppose that the veriest child would understand that this means killing not only the Stalinist regime but the October Revolution as well. To get around this fact the manifesto resorts

to the purest form of mysticism. Hitler's victory will at the same time mean his defeat! How come? The Russian proletariat will then revive, Hitler having rendered them the proper aid for the purpose by getting rid of Stalin. Incredible, but here it is: "Assaulting Russia, the most he can do, besides getting some immediate material advantages in case of an over-powering but transient victory, is to destroy a decayed regime and crush Stalinism. But the Russian land in its immensity will absorb his exclusively military victory and meanwhile the people, who are tempered by the traditions of their great revolution and brought up in anti-fascist hatred, are immune from internal poisoning by means of assimilation of the conqueror's ideology. By destroying with his guns the Stalinist totalitarian regime, Hitler, like the sorcerer's apprentice of the fable, will have set loose the forces of history, bringing forth the torrents of revolution."

If the Russian workers were unable by themselves to throw off the Stalinist incubus, just how will they be enabled to throw off the more powerful Hitler after his complete dispersal of all Soviet forces and institutions? Please do not expect any kind of answer from the manifesto. Its thinking is on a plane all its own, following no laws of either ordinary logic or of dialectics. but a schematism that fits an unreal world. The question remains: aside from canvassing, even in its own peculiar way, all the possibilities of victory or defeat, is the WP for or against Russian victory, or is it completely indifferent? Only shame-faced cowardice keeps the manifesto from giving a simple answer to this simple question.

#### Class Rule In Army Shows It Will Not Fight For Democracy By A DRAFTEE A great many draftees entered the Army with the illusion Army and is punishable by sea cause which is in their interthat they were going to be trained to defend democracy. They vere penalties.

are fast learning differently, and it is the Army regime itself which is educating them to a considerable extent on this score. The draftees are learning that the Army itself is not a

the officer corps, and it is the of the draftee's life.

The foundation of that bourgeois "democracy", which we are told we are preparing to defend, is freedom of expression. But freedom of expression is non-existent in the Army. That is the gate conditions in the Army first thing impressed upon us when we enter the Army. Upon being inducted, we were warned against "agitators" and told to report men who are "beefing". More recently, we were instructed not to talk to "outsiders", not even to members of our own families about the conditions we face in camp. "It is none of their viewpoint. The draftees who gave the information which formed the basis of the articles on army conditions in Life and other magazines have been viciously condemned by the officers.

The official army regulations are so designed as to throttle any attempt of the draftees to speak out for improved conditions. Any concerted action of this sort would result in courts martial, as a violation of the Articles of War, and the imposition of severe punishments.

#### OFFICERS TRY TO KEEP FACTS FROM THE PUBLIC

The officer caste is particularly fearful of any movement amongst the civilian population designed to aid the draftees. In order to prevent knowledge of existing Army conditions becoming ublic and thereby arousing civilian support for the draftees, the Army leaders are trying to impose a complete censorship on the draftees. We hope that the effect of this censorship will not lead the outside public to think that there is no need for such a civilian movement. There is. Along

Army's justification for attempt- this line, I hope the MILITANT ing a totalitarian regimentation will continue its efforts to enlist the support of the trade unions. No other outside force could be of more assistance to us. Perhaps some unions could be in-

- the Trade Unions. 9. A Workers' and Farmers' Govern-

## What The Prosecutions Cannot Accomplish

"The party has been killed recently, which no doubt accounts for its extraordinary activity. There is nothing that helps the Socialist movement so much as receiving an occasional death blow. The oftener it is killed, the more boundless, the more active, the more energetic it becomes."

These words were spoken by Eugene V. Debs in his famous Canton Speech 8h June 16, 1918, the speech expressing his uncompromising opposition to World War I for which he was placed on trial before a federal court in Cleveland and sentenced to ten years in jail.

Debs' words apply just as well today to the situation of our party.

Next Monday, October 20 (by a coincidence the fifteenth anniversary of the death of Debs), 28 members of the Socialist Workers Party and of Motor Transport and Allied Workers Industrial Union, Local 544-CIO, will face a federal judge in Minneapolis for their opposition to imperialist World War II.

The first national meeting of Trotskyists since the indictment was held in Chicago on October 11-12. If the government expected, by the blow it struck in indicting the 28 defendants to cow or demoralize or frighten the Socialist Workers Party, it received only a surprise and a disappointment. For not only was this Plenum-Conference the

largest ever held by the American Trotskyist movement, but also the most enthusiastic, the most determined, the most spirited.

This was not because the delegates light-mindedly underestimated the seriousness of the imposing machine arrayed against them.

The delegates took this fully into consideration, but they looked deeper than the surface, and they were not dismayed by the government's prosecutions because they saw in them not a sign of the strength, but of the desperate weakness of a decaying capitalist system.

The representatives of this dying social order may try, and they may succeed, in imprisoning or otherwise removing some of its opponents. But because their system can produce only war and fascism and hunger, they can never destroy the opposition to that system itself.

The Socialist Workers Party, of course, does not desire prosecutions. But neither is it afraid of them, and neither will it back down on a single thing it stands for because of them. This was shown by the spirit and decisions of the Chicago Plenum-Conference. It will be further shown by the conduct of the defendants in the Minneapolis court room, and by the future party activity.

### Discarding A Fiction

Roosevelt has taken another major step to drag this country into the imperialist war, by demanding the repeal of that section of the Neutrality Act which bars the arming of American merchant ships.

As in almost every other instance when Roosevelt has sought Congressional action, this latest step is intended merely to give legal sanction to measures he has already taken.

American merchant ships — under cover of Panama registry — are already travelling armed on the high seas. It has been revealed that the Pink Star, which was recently sunk, was one of these armed ships.

The arming was done secretly on orders of the

Navy Department. Scores of other ships — how many is not exactly established, but it is known to be a large number — have been similarly armed.

It is by such tricks and evasions that the Administration has consistently violated the clearly established intent of the Neutrality Act, which has not yet been repealed.

In calling for the amendment of the Neutrality Act to permit arming of merchant ships, Roosevelt is simply discarding one more legal fiction. From first to last, Roosevelt has regarded the Neutrality Act with utmost cynicism. He has

permitted it to be flagrantly violated, and has aided and abetted these violations.

So long as he was able to carry out his war-like measures within the framework of the Neutrality Act, Roosevelt preferred it. If the Act did not, in fact, prevent him from sending arms to belligerents in American ships, if it did not prevent him from arming merchant vessels or taking all the other steps he has taken to involve this nation in the imperialist war, that was all to the good. Then the fiction of "neutrality" was useful in concealing his war designs behind a screen of "péaceful

But the Neutrality Act no longer serves this purpose for Roosevelt. It has become an impediment to him. He is preparing for all-out war, and

So, as fast as he is able, Roosevelt is scuttling even the legal fictions of the Neutrality Act. In the meantime, he continues to arm American merchant ships — under a Panama flag.

### How the CP'Aids'USSR

The terrible losses and defeats in the Soviet Union — which make it clearer than ever that Stalinism is incapable of leading the workers state to anything but disaster — have had but one effect on the Communist Party in the United States: to intensify and deepen their support of the Roosevelt war program as the only means of defending the Soviet Union.

In a single day, for example, on Friday, October 10, the Stalinists came out with the demand that the United States enter the war ("Open the Western Front as the joint military undertaking of America and Britain"); threw their full weight behind the drive to shackle the labor movement to the war machine ("Anything that interferes with production of needed war supplies — whether as a result of strikes or of delays by the employers — can only help Hitler and weaken the defense of the United States"); and withdrew their own mayoralty candidate in the New York City elections in favor of the union-buster LaGuardia.

The Stalin regime in the USSR has staked all its hopes on 'aid' from the 'democratic' imperialists, and has shaped all its policies accordingly. It has refused to make any kind of appeal to the German masses to overthrow capitalism and establish a Soviet Germany — the policy of revolutionary war successfully followed by Lenin and Trotsky in the early and dark days of the workers state. The Kremlin has not even dared to promise the German workers that it will fight side by side with them against another Versailles treaty and by silence on this question has permitted Hitler to hold on to the demagogic weapon that wins support for his war in Germany.

The Stalinists in this country are not carrying on their warmongering, anti-labor activities because they like imperialist war or because they get pleasure out of strike-breaking. It is simply that they are implementing and supporting Stalin's reactionary line and its American off-shoots.

And the American working class will hold the Stalinists responsible not only for their vicious domestic policy, but also for the part they are playing in helping Stalin to lead the Soviet Union to the very brink of catastrophe.

## Whitewashing Jim Crow

"Col. Charles B. Elliot, commander of the nation's largest army camp at Fort Bragg, N. C., has been removed after his flagrant anti-Negro policies led to the needless death of a Negro and white soldier," says an editorial entitled "A Victory for Negro Rights — and National Defense" in the Daily Worker of Oct. 11.

But this was not a victory for Negro rights it is only an attempt by the Stalinists to win support among Negroes for the Roosevelt war program by distorting the facts to make it appear a victory.

Elliot carried out consistent anti-Negro policies while he commanded Fort Bragg, and it was these policies, not Elliot alone, which were responsible for the murder of Private Ned Turman, Negro draftee whose last words after defending himself against brutal attacks by military police were "I'm going to break up you MP's beating us colored soldiers!"

And this policy was not originated by Elliot, it was only carried out by him. This Jim Crow military policy came from a higher source even than the officer commanding the fort — it came from Washington, from the office of the commander-in-chief of the armed forces, from Roosevelt himself, that great "democrat" whom the Stalinists now support.

Further proof that this was no victory for Negro rights lies in the fact that while Elliot was dismissed from command of Fort Bragg, he was not dismissed from the army. He was only transferred to another fort, where he will be able to continue to carry out the same practices and policies he carried out at Bragg.

All the whitewash in the world will not be able to hide the truth that Roosevelt is determined to use only a Jim Crow army in his crusade for "democracy". It was so before the Nazi-Soviet war began, it is so today. The only difference is that the Stalinists exposed it before, and they try to cover it up now.

## "Why We Left The Petty **Bourgeois Opposition**"

#### Statement of 12 Former Worker Party Members Who Broke With the Shactmanite Group and Rejoined the Trotskyists

(The following statement, which we publish in condensed form, was issued at the recent convention of the so-called Workers Party, the petty bourgeois opposition which split from the SWP last year. The statement is signed by twelve former WP members who conducted a struggle within this organization for the defense of the Soviet Union and for the principles of Trotsky-

These twelve revolutionists are predominanty factory workers. Among them are trade union organizers and officials. All these party activists and serious militants, after announcing their resignation, affirmed their intention to join the ranks of the SWP, where all sincere revolutionists belong, and where they can always find their

A year and a half ago, together with the present leadership of the Workers Party — defections excepted — we took the responsibility for splitting the revolutionary movement in America. We did this with the firm conviction that we were following the path of revolutionary Marxism and were acting in the best interests of the world proletarian revolution.

Today, we find that not only were we seriously mistaken, but that the Workers Party has traveled so far from Marxism, that it is in a deep, insoluble internal crisis. At this point it must either run its course to complete revisionism or fall apart from its own centrifugal force. . .

The attitude of any group in the working class movement towards the Russian Revolution, the character of the Soviet state and the defense of the USSR from imperialist attack is the touchstone of its attitude toward all fundamental, principled problems confronting the international working class. More than once has this been said and proved but it is doubtful whether it has had a more eloquent confirmation than the course of the Workers Party since the outbreak of the Soviet-German war...

Under the impact of this blow, the superficial cohesiveness of the Workers Party has been shattered and its internal state of chaos revealed. . . Before the Soviet-German war, the dissident tendencies expressed themselves within the Party thus: First, in the shameful desertion of Burnham, a leader of the Opposition (and, incidentally, originator of the political theories which are today making the greatest headway within the Party). Then, in the defection of a crude opportunist tendency among the youth, the Shermanites, who made their way in a single leap from the Workers Party to the political degenerates of the Socialist Party. Then, in the endless debate between the P. C. and MacDonald, who finally gave up trying to disprove Trotsky's predictions as to his fate and joined Burnham in political oblivion. And throughout this entire period, all the tendencies vied with one another in a hasty retreat from the fundamentals of Marxism as they have been accepted and understood historically in the revolutionary movement.

Since the Soviet-German war, the Party has ntered a new stage in the perpetual internal struggle. In the National Committee, there are no less than four separate tendencies — all representing a retreat from the basic doctrines of Marxism and Leninism.

#### CURRENT TENDENCIES

Carter, who reportedly has a large following n New York and thereby in the national organization, cynically admits that Trotsky was right in posing the question of the character of the USSR as the fundamental question and then proceeds to discard virtually everything else of significance in Trotsky's writings and theories. Aside from the fact that he still remains in the movement while Burnham is out. Carter has no other differences with his ideological mentor. He holds the entire revisionist concept of Burnham. It is only a matter of time before he is faced with Burnham's admitted choice: win the party over to revisionism or leave it. Unlike Burnham, Carter may not have to leave; for he is well on the way toward success in winning the party over to his anti-Marxist program already.

Johnson covers his revisionism in the most accepted style - by long quotations from Marx. But his characterization of the USSR differs from Burnham's only academically. It is only a matter of time before there is at least a temporary truce between Johnson and Carter. The content of their characterizations of the USSR is identical and they will undoubtedly be driven over the hurdle of terminological differences to achieve factional unity against the centrists. . .

Shachtman continues to oscillate in the realm of his anti-Marxist formulations on "the character of the war," repeating his performance of a year and a half ago. He notifies the Russian workers, who are waging an heroic battle against imperialism, that this time he will be a defeatist; although - great consolation - on another occasion he may be a defensist. Thus, in practice, he finds agreement with the revisionists, although for some mysterious reason he continues to find justification for his betrayals of the moment in promises of loyalty in the future. So in the meantime he fights it out with Carter and Johnson to settle the basis on which to be a defeatist. This, with reference to the USSR, where Shachtman heatedly insists there is something worth defending and at a time when the-somethingworth-defending is being destroyed by imperial-

Wilson, E. Lund, etc., are in the most ludicrous position of all. They agree to agree on tactics without first considering the fundamental, principal question involved. They agree on the defense of the USSR without first answering the question of the class nature of the state they are defending. Thus they re-enact the tragedy of the fight within the SWP as a comedy. It does not take great powers of prediction to forecast that the unprincipled tendency of so-called "conditional defensists" will find common ground with Shachtman. In practice these people will capitulate to the defeatists by finding the formula of unity wth them against the unconditional defensists. As the whole experience of the building of the Fourth International shows, centrists who are moving to the right invariably forget their ostensible agreement with the Marxists on fundamental, principled questions in favor of organizational combinations with the anti-Marx-

One year and a half after the split from the SWP we are forced to say clearly and with full knowledge of the implication that the Workers Party is a petty bourgeois centrist conglomeration of tendencies traveling away from Marxism.

The Soviet-German war and its impact on the party is for us the crucial test. It places before the international working class the task of the revolutionary defense of the Soviet Union. In the face of clear evidence confirming the whole thesis of the Fourth International - from its foundation documents to the factional struggle of two years ago - has the leadership of the Workers Party indicated the slightest interest in reevaluating our attack on this thesis? On the contrary, the Soviet-German war has been welcomed by the Party leadership not as the occasion of a step towards Marxism but rather as an opportunity to accelerate the headlong retreat towards the most naked form of revisionism. TROTSKY'S TEACHINGS FORGOTTEN

It is amazing how many of Trotsky's basic contributions to the revolutionary movement have already been forgotten within the Workers Par-

(It should be noted that some of the revisionists - Johnson and Carter, notably - are already developing the rationalization-theory that "Trotsky has been wrong for fifteen years." At the time of the split, Trotsky was only wrong on the question of the day. Now, when they are discarding all the basic principles of the Trotskyist movement, they conclude that Trotsky has been wrong all along. The next step is their inevitable conclusion, after they are forced to realize that they are deserting Marxism, that Marx, Engels, Lenin, etc., have been wrong all along too. . .)

To refresh the minds of those who have forgotten too soon:

On the nature of the Soviet Union, its class character and the Stalinist bureaucracy: The Revolution Betrayed. Does it seem strange to name this work, an accepted classic in the movement, as recommended reading for everyone? Yet it answers all the questions raised by Carter and Johnson and accepted by a large part of the

On the deense of the USSR from imperialist attack — The USSR and the War. This, some of the present defeatists may recall, is the thesis written by Trotsky at the outbreak of the second world war and published in the New International. Perhaps they will also recall that it was accepted, by and large, by the Minority Faction both during and after the factional struggle. In this document, Trotsky anticipates Burnham's managerial revolution, Johnson's capitalist society theory and Shachtman's new social class. None of these refuted the document or even tried to disprove it. But what is most important is that Trotsky indisputably proves that his refutation of these revisionist theories flows from the very principles which made the October Revolution. . .

On the nature of the Workers Party, written before the Party was actually formed and borne out by the experiences of the past two years — A Petty Bourgeois Opposition in the S.W.P. and From A Scratch To Gangrene. Also familiar names? To many of the comrades in the Workers Party they are already forgotten. But the clarity with which they analyze the Workers Party — in advance! — and the accuracy with which they predict its course cannot be gain-

This is the program on which we must take our stand and this is the ideological basis from which we derive our program. We cannot stand with the revisionists, whose motion is in a straight line away from revolutionary Marxism. The party which adheres to and advocates Trotsky's ideas and Trotsky's program is the Socialist Workers Party and with it we find political solid-

To the comrades of the Workers Party, we repeat over and over again: Watch the developments within the Party and see where they lead. From Wilson — to Shachtman — to Carter to Johnson — to MacDonald and Burnham. From "conditional defensism" — to "conditional defeatism" — to unconditional defeatism — to rejection of the class struggle. From the rejection of Marxist (class) criteria — to the rejection of Trotskyism — to the rejection of Bolshevism to the abandonment of the revolution. How many times has this fatal course been traced. . .

To the comrades of the Workers Party who see this tendency clearly and understand its implications, we urge: Join us! Join the Socialist Workers Party and he p build the party of revolutionary Marxism!

### What Has Inspired The Growing Unrest In Occupied Lands?

By MICHAEL CORT

The German military machine is conducting the most extensive rear guard action in modern military history. This action is not confined to the immediate rear of the German-Russian battle lines; it extends from the Ukraine westward to the Atlantic and from the Arctic Circle south to the Mediterranean and Africa. The whole of occupied Europe, seething with revolt against Nazi rule, is in a continuous process of being "mopped-up."

Since June of this year 76,000 persons have been searched and questioned in Paris alone, according to statistics issued by the Nazi forces of occupation this week. Of the persons questioned, 1,000 have been arrested. This is exclusive of the mass roundups of Jews and the house-to-house searches for revolutionary leaflets and arms. These figures for a single city give an idea of the extent of the preventive measures which the Nazi have found it necessary to take in order to maintain their rule through-

Summary courts in Prague sentenced to death 15 persons last Saturday. Open warfare is being waged in Croatia between the Nazis and native guerrillas. Entire regiments of Roumanian troops have revolted when ordered into battle on the Odessa front. Five German regiments marched through Bulgaria this week on their way to Greece to aid the Italians who have been unable to keep order in that country. Bulgars and Danes and Dutchmen and Norwegians are all striking at their Fascist oppressors, though they face certain death whenever they get caught.

The methods of terror now being employed to suppress this unrest, are not the methods that Hitler voluntarily chose as the means for safeguarding his rule — they have been forced upon him by the desperateness of his position. He would much prefer to obtain the voluntary cooperation of the conquered peoples. Such cooperation would relieve the Reich of enormous costs in men and materials. But Hitler's "collaborators", his Quislings and Petains, have become increasingly impotent, and so he is forced to use his own soldiers and his own gunpowder. INVASION OF USSR INSPIRES REVOLTS

The present wave of anti-Nazi demonstrations and sabotage in occupied Europe had its inception with the outbreak of the Nazi-Soviet war. This is a significant fact.

The European masses did not rise up to strike at the Nazis when Denmark fell, or Norway, or France, or the Balkans. When England faced what appeared to be certain invasion, she found little sympathy or support on the Continent. It was only when the German Fascists turned on the Soviet Union that they experienced real difficulties in their rear.

The blows now being struck against the German forces of occupation are largely blows in the defense of the Soviet Union. The persecuted masses turn instinctively to the workers' State for leadership in the hour of their darkest need. This action is spontaneous and instinctive only because no call for revolutionary solidarity has yet come from the bureaucracy ruling the Soviets. The Kremlin gives no conscious proletarian revolutionary direction to the

Stalin has conducted his agitation on a strictly nationalist patriotic level. Anything else would have offended his imperialist allies in London and Washington, who fear workers' revolution as much as Hit ler. And yet, in spite of the lack of real revolutionary leadership, the European workers show their understanding of the difference between a workers' state and a capitalist state. They know that in the Soviet Union there are no capitalist landlords and bosses. They also know that the Allied powers, like the Nazis, are warring only for the benefit of the capitalist bosses. They know that to eliminate capitalist war they must eliminate those who profit from it - and this has been done only in the Soviet Union. That simple fact turns the oppressed peoples of the occupied countries in the direction of the first workers' state. "DEMOCRACIES" DO NOT AID REVOLTS

The Nazis recently ceased the practice of labeling all saboteurs "Communists" and often refer to them now as "agents of Britain." Obviously these brave men and women are not agents of Britain, otherwise they would have struck when Britain was most imperiled — not when the Soviet Union is fighting for its life. Churchill, however, gladly accepts the "responsibility" for the uprisings. He would like the British and American workers to think that these growing revolts are manifestations of support for the "Democracies" and he would like to sidetrack the unrest away from the direction of a class revolution.

Each time Churchill takes credit for a wrecked train or a slow-down strike, he lands a blow against the peoples now struggling to throw off Hitler's yoke. Churchill is an enemy of Hitler; but overweighing that is the fact that he is the enemy of the German people. He represents another Versailles Treaty with all its misery for the conquered. However much the German people may hate Hitler, they hate and fear no less the rival British and American imperialists who would shackle the defeated peoples to a system of foreign oppression more violent even than that imposed by the monstrous Treaty of Versailles.

Each time Churchill claims credit for an act of anti-Nazi sabotage, he tends to alienate the German and French and Greek people from the saboteurs. He discredits the motives of the anti-Nazi sighters and in turn increases the prestige of Hitler, who bases much of his propaganda upon the very real injustices done the people of the Continent by the Treaty of Versailles.

But, in spite of Churchill's harmful attempts to give a "democratic" imperialist color to these revolts, the resistence to Hitler increases. With little hope of direct military aid from the Allies, the masses nevertheless take up arms and challenge the invader.

All this occurs in spite of the past betrayals of revolutionary situations by the Kremlin; in spite of the lack of revolutionary leadership in the present crisis. If the Russian Soviets are revitalized, if Stalinism is replaced by Bolshevism, if the Soviet Union issues an international revolutionary appeal, the European masses will respond in a manner that would explode Europe and drive German and Allied imperialists alike off the face of the world.
