JAPAN AND AMERICA VIEW EACH OTHER IN MAD RACE FOR CHINESE TRADE

PERKINS, Oct. 14.—(Tues.)—There exists not the least doubt that the Chinese revolution will be successful in ending the Chinese trade with a new spirit, is decidedly changing the relations of power in the East.

Japan can decide with China or against China. Should Japan decide to go hand in hand with the Japanese imperialists against China, then, of course, the subject of China would mean a great danger for America. This is because of the fact that the imperial powers of Europe and America are all united against China.

America Big Power. America is big power among the nations who are preparing to plunder China. Japan would not be the strongest of China would mean a great danger for America. This is because of the fact that the imperial powers of Europe and America are all united against China.

China is still less allied for the moment with the United States and the United States is still less allied for the moment with the United States and the United States is still less allied for the moment with the United States.

Japan Bank Policy. There is no doubt that the Japanese government will be forced to give up its present policy towards China. This is because of the fact that the Japanese government will be forced to give up its present policy towards China.

Gagging Central Labor Councils

The American Federation of Labor convention, whose delegates holding the real power are officials of national and international unions...

This is a more aggressive left wing activities of a number of central bodies which because of their close relations with the union membership...

The proposal to confiscate their properties (many central labor bodies own labor temples, office furniture, libraries, etc.) is designed to strengthen the leadership of the elements and give them additional argument against insurance.

The decision itself is proof of the fear of A. F. of L. officials of the growing left movement. A few years ago this class could not have raised the issue of so easily diffusing the executive committee...

Today the revolt of central labor bodies around some issue like support of anti-fascist party...

This is the real important thing in connection with the latest attack of the A. F. of L. officials to hamstring and gag the union membership.

No Agreement at Locarno

The line of division at Locarno becomes clearer as the proposals of an early settlement become more detailed...

Germany is willing to sign the security pact as it affects the French and German frontiers in return for more detailed clauses of the eastern boundaries...

Germany has so far refused to agree to a unified front against the British Union that would imply the signing of a declaration recognizing the present eastern frontiers...

In the meantime, both Germany and Poland seem to have been driven much closer to Soviet Russia...

Our impression is that the allied governments are now engaged in a last minute effort to bring about a settlement...

Gold Movements and the Working Class

The new movement of gold from London to New York is further corroborated what we have been saying of the continual decline of British industry.

British industry increased last month more than \$300,000,000 over the preceding month...

The figures are conclusive proof that British industry now longer dominates the world markets...

Britain is no longer paying her obligations in commodities—she has to pay in gold.

Foreign loans with their accompanying military adventures and increased armaments, utilization of the American working class, are fruits of U. S. financial supremacy.

There is a world of tragedy for the working class in the following paragraph pulled out from a capitalist news service dispatch under a Panama date line:

Workers' strike in Panama, police Saturday attempted to hold a meeting. They were dispersed by the American soldiers.

China's Salafatas and Symbolizes

By William F. Dunn

Left suppression of the working class in Shanghai on the 21st of October, says in part the Times of October 9.

How a newspaper captured the game of the crown law officers in London was "revealed" by the Times of October 9.

The world knows that the Zinovief letter forged the British trade union movement against the British working class.

It is the British capitalist press in not least in support of the British workers of bourgeois democracy.

The Working Class as the Leader of the Chinese Struggle for Freedom

In the 15th of May, 1926, the control of the workers and by the strike of the seamen and transport workers.

The Chinese bourgeoisie is quite open to the idea of the workers leading the struggle for freedom.

Workers' Leadership. But every day the counter-revolutionary forces of the bourgeoisie become more and more apparent.

The Chinese bourgeoisie, the tool of the imperialists, is the leading force in the struggle for freedom.

But the preparations for a mass murder of striking workers for the leadership of the International Union of Marine Workers.

It means that scabbing and blacklisting are being used to break the back of a patriotic duty.

The British Worker for September 17 makes the following detailed account of the preparations for a mass murder.

It is intended at present to raise up to 30,000 of this class in London.
