It is understood that the State Department has suggested as a remeditation to be borrowed China be increased to such an amount that a quarter shars of the in-creased loan would be about equal to the third of the amount of the loan originally suggested. This would make it necessary to increase the loan to about \$36,000,000. It is believed that diplomatic negotiations are now in progress to ascertain whether or not the Chinese government will consent to the proposed increase.

AFTER JAP SOCIALISTS

Mikado's Government Trying to Stamp Out International Movement,

TOKYO, July 18 .- The government is resorting to severe methods in an effort to wipe out the Socialist movement in Japan. The party organ, the Jiyushiso, has been suspended. Dom-iciliary searches are being conducted

and a mass of prohibited literature has been seized

The official Home Department as serts that the movement is less wide-spread in the eWst, but is far more violent, bordering on anarchy, with the preaching of free love doctrines subversive of social order and the sanctity of the throne.

Feudist Trusts in God, but Keeps His Powder Dry.

The development of capitalism in Japan has been naturally accompan-ied by the formation of an organized Socialist movement, and it is evident that the government is fully aware of the danger to it of the spread of internationalism in a nation which occupies its present position as a "world power" chiefly because of the fanatical patriotism of its inhabitants. P. O. SUBS GET **BIG WAGE CUT**

Government Employes Earn Fifty Per Cent Less During Summer Vacation Season.

The mail carrier subs of Greater New York are all in a mood of kicking them a reduction of more than 50 per cent in wages during the summer vacation season

. Their complaint is that while the regular carriers and clerks all get their two weeks off with full pay. they, the subs, have had their work-

ing hours cut from eight to three In former years a sub carrier ceived payment for his work at the rate of \$600 a year Last year a new schedule was brought into use which regulated the pay of subs at the rate of 30 cents an hour, and they were worked six hours a day. Bu year the schedule has again But this

Beginning with the vacation sea son of this year and continuing till some time in October, each sub will get but three hours' work a day and without a vacation as his more fortunate fellow workers, the regulars, do he will have to content himself with the meager sum of \$5.40 a

Under this new system the subbins carrier must report at 6 A. M., leave his office at 7, and return without fail at 9. If his mail is not all delivered, he must bring back what is left over, and then a regular carrier takes it along on his next trip.

The subs declare that there is also an injustice worked on the public by this new schedule. For by this present system the people will receive three visits a day instead of which is the regular number they are entitled to. "But then," said one of the subs. "the public is accustomed to worse things than this, so we can the substant off as a side afford to pass that part off as a side

THE WORLD OF SPORTS

BIG JEFF SPEAKS

Several Things Happen.

James J. Jeffries finally has declared himself regarding his proposed fight with Jack Johnson, which, if it materializes, will not take place outil the middle of next winter, or later. Jeffries says his theatrical stunts will be wound up next Saturday and that he then will sail reclared and that he then will sail reclared to the collins covered 39 miles 2 laps, and unday and that he then will sail reclared to the baths for several weeks. He further says Carisbad, where he will take the baths mile and a lap to the bad.

The summary of the races follows: Half-mile Handicap—Victor Anderforfeit to bind a match with Johnson and that Sam Berger, his manager, Journey, Nutley (30 yards), second; T. moment Jeff puts up a forfeit he will cover it, sign articles and then await the bids of promoters. He doesn't say how long a bout he wan! doesn't say how long a bout he wants, but Jeffries probably will hold out for a forty-five round or finish contest. If such a mill is arranged it is safe to say that California or Nevada will get it. Promoter Coffroith declares 'nathe will outbid any other promoters, but he will have to name a big price as the Nevada people, it is underslood. as the Nevada people, it is understood, will offer as much as \$50,000 for the mill with Goldfield and Ely both in

A GOOD WORD FROM DIXIE.

The New York Evening Call has been changed from an evening to a morning paper, and to say that it improved by the change is saying a good one year ago it has had a faculty of giving news that is persistently pressed by the great dailies, and by publishing mornings instead of evenings, its scope is greatly enlarged. Every one who believes in curtailing the encroachment of capital over the rights of the common people should subscribe for and read The Call.—The Buoy, St. Andrews, Fla.

JUSTICE

Sermon by John D. Long, D. D. national secretary of the Christian Socialist Fellowship, in the Parkside Socialist Fellowship, in the Parkside Church, Brooklyn, N. Y., July 18,

"And Pilate gave sentence that what they asked for should be done. Luke xxiii: 24.

Dr. Parkhurst has recently been amenting the increasing tendency to riticise the judiciary. He suggests criticise the judiciary. He suggethat to question the rulings of judges is a kind of blasphemy, a species of sacrilege. Under this view the action of Pilate in Jesus to the cross ought not to be reviewed unless with favor.

"Ah, but." our reverend doctor would object, "the case is different Pilate was condemning the innocent. but our present day judges condemi the guilty. Since when, however, did this

change come to pass? Has not the judiciary of every period been appointed by the ruling class, and in an ages hitherto has not all rule been the reign of the oppressor? Take this present blessed year of grace in which the cood doctor pens his pletfor consideration of our courts. Who appoints our judges? Is it not done
by organizations controlled by the big financial interests? Who appointe Pilate? Was it not the money power Who appointed at Rome? Who put in power the Jewish Sanhedrim which first con-demned Jesus and then secured a confirmation of their judgment at Pi . It was the men of the Dives class. Once when I referred to the work of the Sanhedrim in the cas of Jesus, some one in the audience objected that it was the Romans who crucified Jesus, not the Jews. tort was, "It was neither the or the Jews who stucified Jesus, but the money pewer, which knows neither race nor religion."

You may remember the visit of Nicodemus, who came to Jesus by night. We know the modern tenthe dark. Nicodemus belonged to the Dives class and came to Jesu Nicodemus belonged to clandestinely to try him out. He found him impractical. Jesus could not be worked in the interests of the hierarchy or the plutocracy. So we find them later asking scornfully, "Have any of the rulers of the Pharisees believed on him?" No, Jesus would not do their bidding, and so they rejected Him. We know Barnum's dictum about

the fondness of the American people being humbugged? It would seem to be true. Jesus could not be humbugged and so the only way to get rid of Him was to do Him to death. Jesus saw that the evils that cursed society were upheld by the rich and religious, and so the only man that he ever sent to hell was the rich man in the parable of Dives and This man, like the wealth; class of our day, was devout and doubtless thought to atone for his in-Jesus thought that such as maintained the hell that He saw upon earth ought to have their portion in hell hereafter. You may exclaim, how-ever, against so severe a judgment against the plutocrats of the present, but wait a moment. Take the case of that anomaly a just judge, Ben Lindsay, of Denver—the famous chiliren's judge. . What did he find? Why, he found that the vice of the city was in alliance with the big finan cial interests and that these interests the owners of the traction, gas water and the other utilities by which the people were robbed, were in di-rect alliance with the thugs and act, responsible for the continuance of vice and crime. There was hell in Denver, and Judge Lindsay could not out it out of business because the money power would not give permis-

Jesus connected the deliverance ociety from economic slavery with ustice. He promised a time of eco-nomic abundance and freedom from inxiety about food, clothing and shell ter when men would seek first, and establish the kingdom of God and His-righteousness. Now, what was the rule of God and His righteousness? the reign of goodness and jus-God was the holy one, the Righteousness, as we find the rood. Righteousness, as we find the 'erm in the original, was a derivative from the Greek word for justice.

Pilate was supposed to deal out justice. In giving sentence against Jesus he dealt out injustice. Our modern judges are supposed to deal in justice. In fact, we call them jus tices. But what about the ruling of our august Supreme Court in the case of the kidnapping of the Colorado minets several years ago, or of the verdict of the Federal Court the other tay out in Kansas in the case of Fred D. Warren? The travesty of justice in these cases is so manifest as to call for no argument. A young lawyer was disputing the dictum of a judge. who finally retorted with the clinches "If you don't look out I will commit you for contempt." The lawyer re-'olned. "Then, your honor, in the future, I will try and conceal my con-tempt." That, however, is very dif-ficult and not desirable. Let the people know that Judge Pilate is appointed by Dives to give judgment according to Dives' will, and that jus tice will not be done in the case of the on of Man-humanity-until judges are appointed not by "the interests," but by the people. This is doubtless a hard task, but

This is doubtless a hard task, but when the people awake they can have their will if they only so desire. Take again the case of Ben Lindsay in Denver. The moneyed magnates would not allow either political party to nominate the judge for re-election. He had no money with which to meet He had no money with which to meet the necessary expenses of an inde-nendent campaign. The official bal-lot, too, was so arranged that it was difficult to vote for an independent andidate. Yet in spite of these handicaps the people rose, and al-though several thousands of his ballots were spoiled, he was triumphantly elected, polling just about as many ballots as all other candidates com bined. This was done notwithstand-ing the hostility of the money power and the press. The people in Jesus' time had small

chance against Pilate and the powers that put him in position. Many in our day are inclined to think that a revolt against the almighty dollar is hopeless. I heard the other day of an elderly man who said to a young relative, an enthusiastic Socialist. "John, there is no use of your butting THE CALL PATTERN

TO BE REMEMBERED.

It should be borne in mind that the news dispatches arriving from the Pittsburg strike district all emanate from the capitalist news agencies. Nevertheless, there have leaked through so many facts revealing the exceptionally villainous character of the management of the Pressed Steel Car Company that it becomes almost impossible to keep track of them.

The most striking of these revelations is the statement given out by ex-Coroner Joseph Armstrong, of Pittsburg, who only recently went out of office. This statement several of the newspapers of this city published in a condensed, generalized, and softened form. And with good reason. For there is nothing in all the charges of violence made against the working people that can for a moment be compared for hideous brutality with the charge made against the management of the Pressed Steel Car Company by the former coroner of Pittsburg. What is the destruction of property, what is the infliction of injury, or even of death, committed in heat of blood, when compared with the cold-blooded, systematic murder carried on day after day at the works of this company?

Some of the facts stated by Mr. Armstrong were as follows:

Insufficient care has always been exercised by those running the plant. The Pressed Steel Car Company kills at its works one man per day on an average. Those running the plant didn't care much whether they killed a few "hunkies" or not. The company had a sort of insurance that was very dangerous to human life, since it let the company out of all damages for deaths from injuries and permitted it to become very careless. Soon after becoming coroner he was compelled to place six or seven men high in the company under arrest in order to compel them to give him information regarding deaths in the plant. He made it so hot for the company that it was compelled to take some precautions, and its death roll was in consequence reduced about 65 per cent.

But notwithstanding the new precautions and the reduction in the death list, the slaughter of the workers continued to proceed at a terrific pace. According to the Pittsburg evening papers one of the mills has long been known as the "slaughter house," because so many men were killed there. Another plant bears the inviting name of the "last chance," for no man ever seeks work in that mill if he has a chance on earth outside-a magnificent illustration, by the way, of the bountiful opportunities which this marvelously rich country holds

The force of these facts is such that any comment or enlargement on them seems impossible. The bare statement of them is sufficient. But let us remember them, let us stamp them ineffaceably on our minds, so that we may at all times comprehend the full sig-nificance of the charge made against the workers that they are given to violent and brutal acts when they go out on strike.

For such occasional outbreaks of violence as occur at strikes, workmen have to pay the full penalty of the law.

For such systematic murder as is going on daily at the works of the Pressed Steel Car Company its high officials were never subjected by the courts to any molestation or censure, not to speak of punishment. Their standing in the church, their influence on the Government, their estimation by the public, are as high as ever. They are model citizens. . Their acts are worthy of emulation.

AS TO CERTAIN ABSURDITIES.

In response to our request for contributions from volunteers, publican bill. we have received a liberal supply of articles and letters of various excellence. Some of these have already appeared in these columns. Others will follow in due order.

But among these there were a few to which we felt obliged to deny hospitality. To some, because of the poverty of their ideas, utter worthlessness. To others, because of their inherent the matter of indefinitely. absurdity.

Of the former it is unnecessary to say anything more than that they were uninteresting, as well as uninstructive. But of the latter it may be well to pick out just one example for public consideration.

In a letter from Philadelphia the writer points out that ther are in the Socialist movement some men of means, or even of wealth, who derive an income from their property in the shape of rent, interest or profit. Some of these men, particularly in European countries, occupy positions of leadership in their respective parties and in the international movement. The sincerity of these men our correspondent from Philadelphia does not see any reason to doubt. But he wonders whether these men will, in the event of Socialist success. cluding property owners from occupying representative positions in the Socialist movement?

We can only advise our Philadelphia correspondent to cease bothering himself and others with absurd questions of this sort.

It reminds us of the question discussed by the monks in the Middle Ages, how many angels could dance on the point of a needle? Or of that other question, which seems to trouble certain Socialists, whether garden patches, sewing machines, pocket handkerchiefs and toothpicks would be public or private property in the Co-operative

Omitting for the present the consideration of that momentou sestion concerning the angels and the point of the needle it seems no one could foretell what their end would be. clear that the question as to whether certain articles of utility or minor instruments of production will become public property or not is one that has not the slightest interest for the workers. It may have some faithful to their task. The surrender of their property, if they have interest for certain weak-minded bourgeois radicals, who would like any, to the community would be the least of the sacrifices they ever to call themselves Socialists if only they were given the positive made on behalf of the movement. For the rest, it is the business of assurance that Socialism would not, after all, differ so very much the Socialist democracy, of the workers themselves, to see to it that rom Capitalism. The workers, who would have no property to its representatives carry out their mandate. Did Jesus of Nanareth coddle and seek the favor of the rich hypocrites of His time—those who made long prayers and devoured the substance of the poor? Did He not call them a generation of vipers? Even so do I.

The Sun has taken a fancy to Julius Hopp and gives him columns of free advertising. Now, if Mr. Hopp was only a capitalist to turn this publicity to good account.

O. C. Barber, founder of the match trust, foresees in a few years a civil war, and, strange as it may seem, he ascribes it to the "slavery of greed" forced by the "grasping rich" upon the "struggling poor." Will M. Belmont also answer this rehegade, who is not even a Socialist?
